

The RESCUE ROBOT Sketch/ Paper Prototype

DESCRIPTION: The prototype is based on Marine life. It has three separate parts. The OCTOPUS part is for rescuing people or object which basically operates with multiple tentacles. The TURTLE part functions as the movement part, which will carry the whole robot in Land or Sea. It uses multiple engines/ propeller or wheels for maneuvering it. And the last one, STING-RAY part is specifically designed for rescuing object from sea bed.

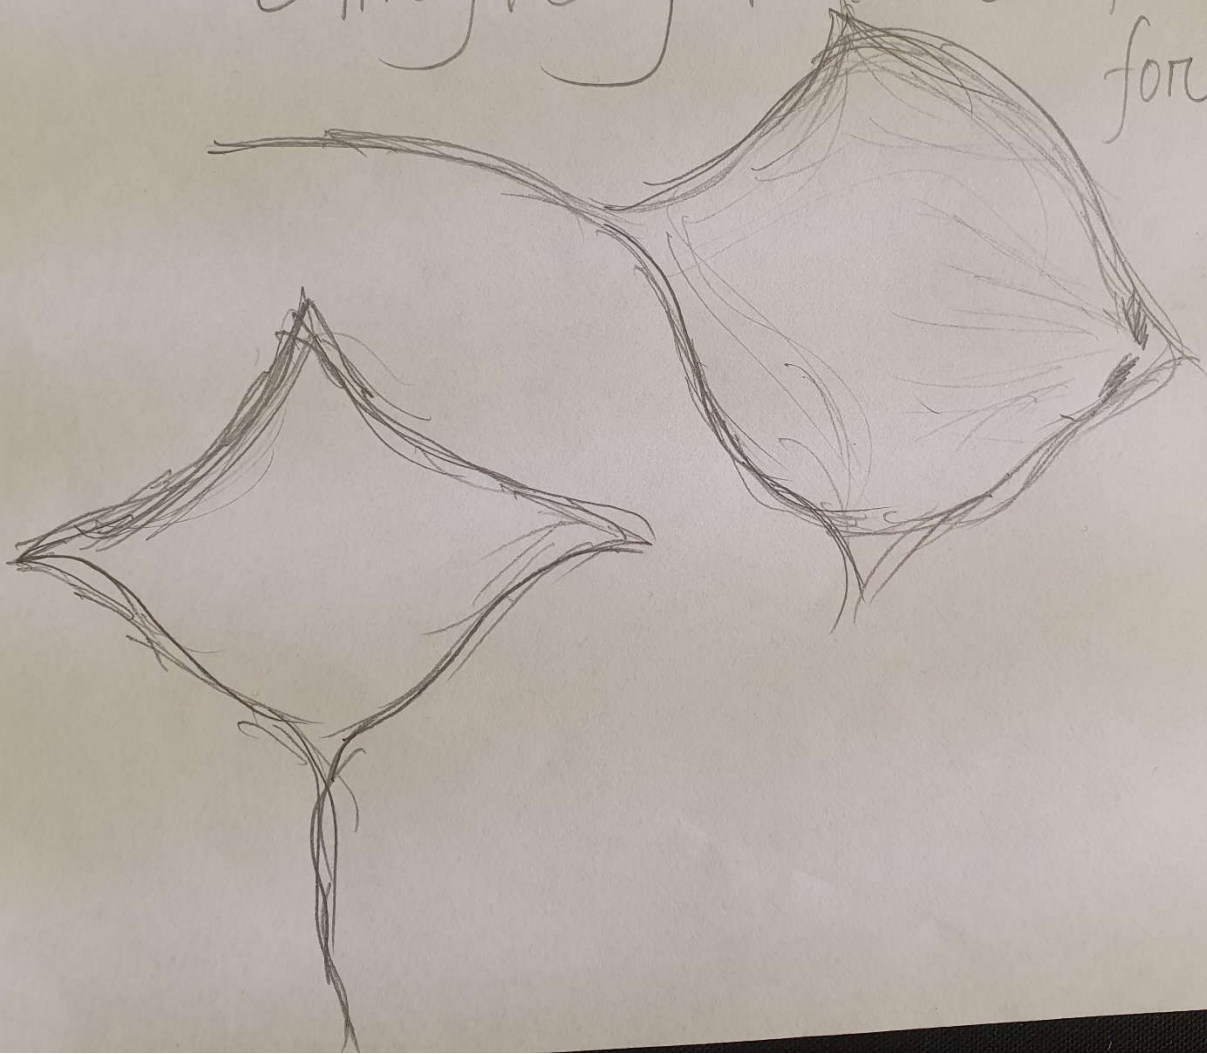

Octopus Part - Rescue Part

Turtle Part 2 Fore movement

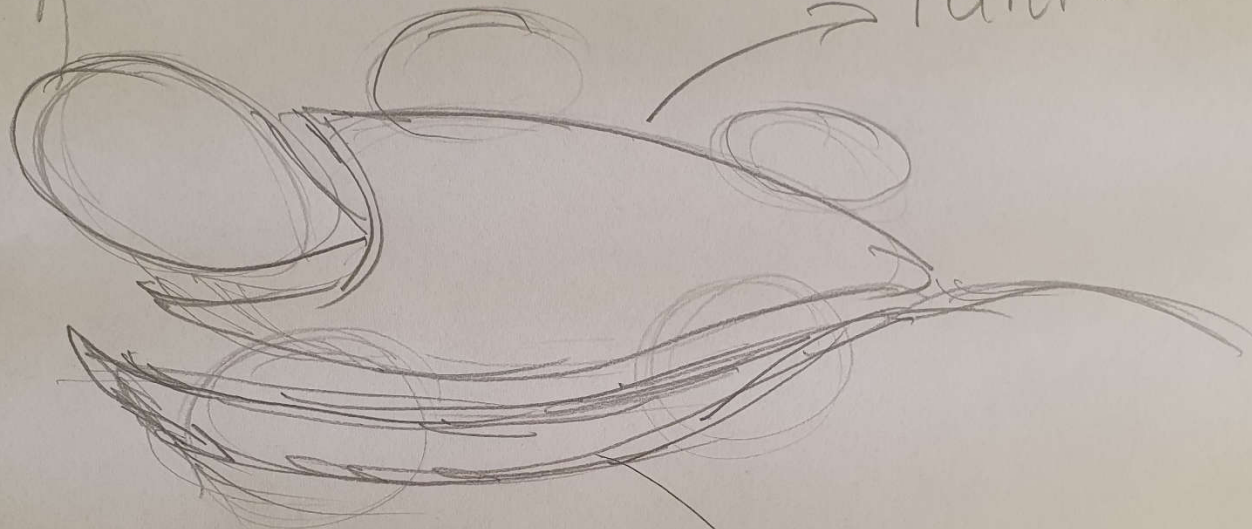

Stingray Part 0 specifically
for sea-bed.

Octopus

Turtle

*All three parts are detachable

Stingray
